PROFESSIONAL EXPERIENCE

Backend Developer
Grupo Pinho, Curitiba, Paraná

- Develop and maintain fullstack applications using NestJS (backend) and Next.js (frontend).
- Build REST APIs with clean architecture, DTOs, validation, authentication and proper error handling.
- Design and implement frontend interfaces using React, Tailwind CSS and shadcn/ui with form validation (React-Hook-Form + Zod).
- Create modular and scalable systems focused on maintainability and real business workflows.
- Work with Docker, environment configuration and local/remote development environments.

IT Support Assistant | Dec 2024 - Sep 2025
VETORE, Quatro Barras, Paraná

- Provided technical support to users and contributed to the maintenance of IT infrastructure.
- Collaborated on the development and maintenance of internal applications using Remix, TypeScript, and Django.
- Supported data-driven process automation to enhance operational efficiency.
- Assisted in analyzing system data to identify improvement opportunities and optimize performance, leveraging Redis and Valkey for caching.
- Participated in continuous improvement initiatives through monitoring, reporting, and insights generation.

IT Intern | Jul 2024 – Dec 2024
Barion, Colombo – Paraná, Brazil

- Worked with SQL and Azure for database manipulation and support.
- Developed business reports using iReport and integrated them into the Sankhya ERP system.
- Provided technical support for infrastructure, including servers, network cabling, printers, cameras, and workstations.
- Handled internal IT support requests, both remotely and on-site.
